

To Turn "Fast Startup" On or Off in System Settings

1. Open the **Control Panel (icons view)**, and click on the **Power Options** icon.
2. Click/tap on the **Choose what the power buttons do** link on the left side. (see screenshot below)

3. Click/tap on the **Change settings that are currently unavailable** link at the top. (see screenshot below)

4. If prompted by **UAC**, then click/tap on **Yes**.

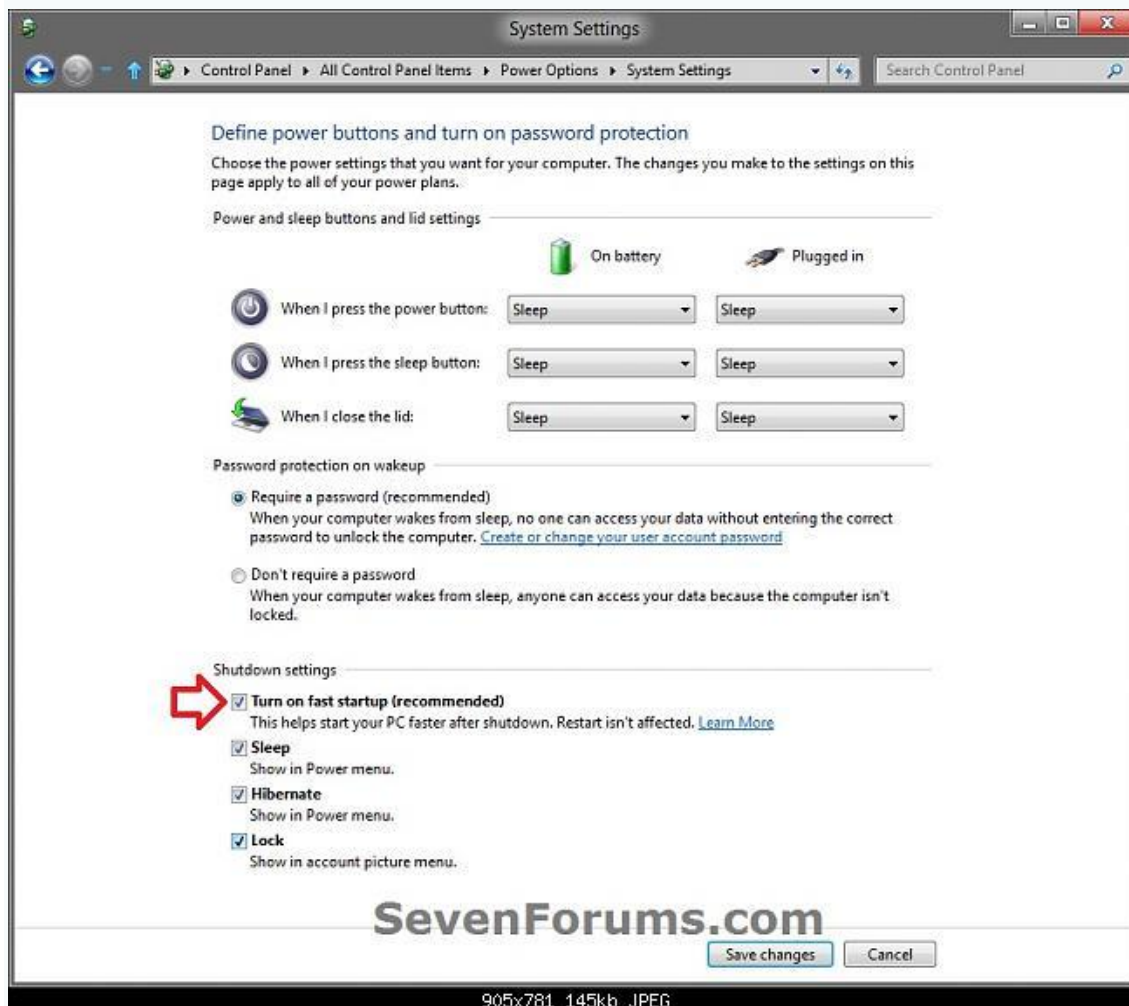

5. Do **step 6 or 7** below for what you would like to do.

6. To Turn On "Fast Startup" (Hybrid Boot) for a "Hybrid Shutdown"

NOTE: This is the default setting.

A) Under **Shutdown settings**, check the **Turn on fast startup** box, and click/tap on the **Save changes** button. (see screenshot below)

NOTE: If the **Turn on fast startup** setting is not listed, then you will need to close the System Settings window, **enable hibernate**, then start back at step 1 again.

B) The **Shut down** Power option will now perform as a **hybrid shut down** when used.

C) Go to **step 8** below.

7. To Turn Off "Fast Startup" for a "Full Shutdown"

A) Under **Shutdown settings**, uncheck the **Turn on fast startup** box, and click/tap on the **Save changes** button. (see screenshot below step 6A)

NOTE: If the **Turn on fast startup** setting is not listed, then **hibernate** has been disabled that removed this setting and also disabled fast startup.

B) The **Shut down** Power option will now perform as a normal **full shut down** when used.

C) Go to **step 8** below.

8. You can now close the Power Options window if you like.
